## DETAILED ACTION

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-36 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-47, 1-48, 1-47, and 26-47 of U.S. Patent No. 6,612,941, 6,431,999, 6,616,551, and 6,458,047, respectively. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present invention and the four patents above claim identical subject matter. The claimed golf balls include a dual core comprising a high density powdered metal and a first matrix material in the center core. The outer core layer has a lower specific gravity and is made from thermosets, thermoplastics, or combinations thereof. The golf also includes a dual cover layer. The present invention is obvious over the patents because the property ranges overlap the claimed properties of the present invention.

One of ordinary skill in the art would have varied the ranges to achieve optimal performance.

### ***Response to Arguments***

The terminal disclaimer filed June 3, 2004 is proper and satisfies the provisional double patenting rejection. However, the double patenting rejection over 6,612,941, 6,431,999, 6,616,551, and 6,458,047 is maintained because the terminal disclaimer does not include the patents.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
